(i) Remarks Water is to be used as a stand-by source, to supplement natural springs which are owned and used by Applicant to furnish the Town with its present water supply; water to be pumped from this stand-by source into tank or into existing service mains whenever spring water is insufficient to supply demands of town, adjacent mines and existing and approved Federal Housing Projects.

DESCRIPTION OF PROPOSED WORKS

Deep well lift pump and pressure pump, driven by Diesel engine, possibly later by electric power; about 3,000 ft. 4" welded pipe line from well to present water main; as shown on map filed herewith which was filed originally with Application 9882, filed by Applicant herein on same source and approved April 16, 1936, but which was inadvertently allowed to lapse.

5. Estimated cost of works \$12,000

6. Estimated time required to construct works 60 days

7. Remarks Equipment has actually been installed and in operation for several months in 1937. When flow from springs was then augmented, pumping from this source was not necessary, but will again be necessary next year due to increased mining activity and Federal Housing Projects.
